PROFILE

Driven Data Science Intern with a strong eagerness to learn and apply the latest advancements In digital intelligence. Skilled in data analysis and machine learning concepts, with a keen interest in extracting insights and solving real-world problems. Passionate about expanding knowledge and contributing to data-driven decision-making in a dynamic environment.

EXPERIENCE

PROJECTS

Chronic Kidney Disease Prediction Project

- Developed a predictive model to identify individuals at risk of Chronic Kidney Disease (CKD) using epidemiological and molecular data.
- Utilized machine learning to analyze genetic, transcriptomic, proteomic, and metabolomic data for early disease detection.
- Conducted large-scale validation of biomarkers and multi-marker classifiers to enhance prediction accuracy.

Bill Management System

- Developed a Bill Management System to streamline bill tracking and management using industry-standard tools and technologies.
- Implemented features for automated bill generation, payment processing, tracking, and expense categorisation.
- Designed an intuitive user interface to enhance usability and efficiency in financial management.

INTERNSHIP

AI - Driven Data Science intern

- During the internship, I worked with Python, SQL, and Power BI to gain hands-on exposure to modern data analysis workflows.
- Power BI served as the main visualization tool, allowing the creation of interactive dashboards connected to multiple datasets. Its components — Power BI Desktop, Service, and Mobile — were used for building, sharing, and viewing reports.

EDUCATION

2021 - 2024
MOHAMMED SATHAK COLLEGE OF ARTS AND SCIENCE, SHOLINGANALLUR
B.Sc.Computer Science

2024 - 2026 (Expected)
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY, RAMAPURAM
M.Sc.Applied Data Science

SKILLS

- SQL & Database Management
- Machine Learning & Predictive Modeling
- Natural Language Processing (NLP)
- Deep Learning & Neural Networks
- Data Visualization

TECH PROFICIENCY

- Python
- Java
- HTML
- PHP
- SQL
- Tableau
- Power BI
- Pandas
- Numpy

CERTIFICATIONS

NATIONAL LEVEL CONFERENCE ON EMERGING SCIENCE AND TECHNOLOGIES

Delivered a research presentation on “**Empirical Analysis of Factors Influencing Obesity Trends in Real Life**” in National Conference in collaboration with IQAC and ESN Publications. Received the **Best Paper Award**, along with a cash prize, for notable contributions to the intersection of health and technology and study’s impact on research trends.

International Conference on Advanced Science and Application of Generative AI & Machine Learning | Government Arts and Science College

- Presented a research paper “Advancing High-Quality Education Through AI-Driven Scientific and Technological Innovation” at an international conference sponsored by ICT Academy.
- Shared key insights on the transformative role of artificial intelligence in enhancing educational methodologies, emphasizing its impact on scientific and technological learning.

Winning Strategies for Paper Presentation

- Conducted an interactive session for junior students on mastering effective research presentation strategies, drawing from personal experience of winning the Best Paper Award at a national conference.
- Provided in-depth guidance on structuring presentations, engaging the audience, and delivering impactful research findings.
- Led a Q&A discussion, addressing student concerns and offering tailored feedback to enhance their confidence and presentation techniques.

Research Methodology & Data Analysis Workshop

- Completed a one-week workshop on research methodology, data analysis, and visualization. Organized by Department of Computer Science and Applications in association with CSI, IIC, and SDG.
